# DIGITAL DATELINE

"BUILD IT LIKE WE OWN IT"

January 3, 2023

Happy New Year and Welcome Back!

I hope you, your family and your teams had a joyous holiday season.

For those of you who worked over the holiday week, THANK YOU. Whether you helped to ship out our vehicles or you worked on critical launch/maintenance projects, we appreciate your dedication and your commitment to safety.

We have several significant launches planned throughout the operations in 2023 of both ICE and EV vehicles, components, batteries, stampings, and drives. 2023 will be an opportunity for Manufacturing to continue to demonstrate our strengths and our value to the company. Launches are always challenging, but I have complete confidence that this team can deliver.

Based on what we know now, we expect to see some continued supply chain challenges. Our hope is that fewer vehicles will be impacted by "build and repair", however, it will be necessary from time to time. To continue to deliver quality vehicles to our customers, our sites will continue to build upon our GMS principles to execute these disruptions effectively and efficiently.

As we look ahead to this year, the Manufacturing Team will continue to play a critical role in building and delivering vehicles to our dealers and customers. The volume of those vehicles will be managed throughout the year as we gain clarity on demand, inventories and economic conditions. With the uncertainty of the economy, we need to continue to be flexible. Our goal will be to manage our sites, every site, efficiently and that requires both accountability and a team effort. To meet our budget, our focus will be on making schedule during our scheduled hours and with our "required to run" staffing.

That's the way we see the year shaping up today. I am sure we will gain clarity along the way and meet any headwinds as they come along. I am excited for 2023 with the launches, the continuous improvement opportunities we have, and the team we have in Manufacturing. It's going to be a great year and we will continue to be One Team, Built to Win.

Be Safe, Be Well,

**Mike**  
Mike Trevorrow | Vice President  
GMNA Manufacturing

### Work-Fit Stretch of the Month - January

#### Wrist Extensor Stretch

Procedure: Keeping your elbow straight, grasp your left hand with your right as pictured and slowly bend the wrist downward until you feel a stretch along the top of your forearm. Once a good stretch is felt, hold for 15-30 seconds. Switch arms and repeat 3 times on each side. Repeat 3 times per day. Great work warm-up/break stretch!

#### Wrist Flexor Stretch

Procedure: Keeping your elbow straight, grasp your left hand with your right as pictured and slowly bend the wrist backward until you feel a stretch along the bottom of your forearm. Once a good stretch is felt, hold for 15-30 seconds. Switch arms and repeat 3 times on each side. Repeat 3 times per day. Great work warm-up/break stretch!
