

# DIGITAL DATELINE

“BUILD IT LIKE WE OWN IT”

**Safety Bulletin**

11-23-22 Employee stepped on a nail and required a tetanus shot at U-68 in CMA Area

**Investigation:** Drove to several known locations in the plant where wood is stacked and found these 3 clear violations.

**Conclusion:** Broken wood cannot remain on the floor for any length of time and needs to be thrown in the trash. There is the potential for nails, and the potential for injury. This is a very preventable injury.

## A MESSAGE ABOUT THE OXFORD SCHOOL SHOOTING ANNIVERSARY

On Nov. 30, 2021, the Oxford community was rocked by the tragic school shooting and deaths of four high school students and the injury of seven others. Many people here at Orion Assembly were deeply affected by this event. Some had children at Oxford High School at the time of the shooting. Others knew the victims. No matter what the connection was, the incident had a profound impact on the surrounding communities and our plant. Now, as the one-year anniversary approaches, we want to stress how important it is for us to be sensitive to the emotions that linger and those that will be roused again as media coverage increases this week. We have plenty of resources available for represented and salaried employees to use if they want someone to talk to about how the tragedy is affecting them. Our thoughts and prayers continue to go out to the Oxford community and everyone else affected by this tragedy. Thank you.
