# DIGITAL DATELINE

"BUILD IT LIKE WE OWN IT"

**CONGRATULATIONS ORION ASSEMBLY:** Last week's corporate visit by GM President **Mark Reuss** and GM V.P. North America Manufacturing & Labor Relations **Phil Kienle** was a testament to the hard work and the **One Team** attitude that was essential to securing a bright future here at Orion Assembly.

In the first quarter of this year **GM** announced the company will be investing upwards of **\$4 billion** to transform **Orion Assembly** into an all-new Electric Truck plant slated to build the all-new **Chevy Silverado EV** and **Sierra EV**. **GO ORION!!**

**2022 Workers' Memorial Day**

**Orion Assembly will observe a moment of silence Thurs., April 28th at 7:30 a.m. in remembrance of our brothers & sisters that did not return home from work.**

**Terry Dittes**  
 UAW Vice President  
 Director, GM Department

"My Brothers and Sisters, Workers' Memorial Day is in fact a time to remember

those who have been injured or lost their lives in the workplace. What is more important is how each and everyone of us work to prevent these incidents in the future. Each and everyone of us have the responsibility to not only protect fellow employees, but also to their family and friends that they return home safe each and everyday. **We must always keep in mind that no job is that important that it cannot be done safely!** Thank you for all you do to keep everyone safe."

**Doneen McDowell**  
 Vice President  
 GMNA Labor Relations

As we remember our Brother and Sisters that we have lost over the past years we must

recommit to our families, our friends and ourselves to ensure our safety is top priority. Please ask yourself every day when you enter your workplace "What will I do to ensure I make it back to the people I care about the same way I left them?" Your safety is important to me and to the people who count on you every day!!! So please, find your "why" when it comes to safety.

[Broadcast & Report](#)

**April 27, 2022 Team** – Anyone who has ever been in a plant knows that the environment is busy with people, material and equipment coming in and out of our operations each day. To keep our work environment safe and secure for all of us, we all have a role to play to support plant security. Simple things that you can do to help are:

- If you see something that looks out of place, alert your supervisor, security or HR/LR. If you see something, say something.
- Help ensure our buildings are secure – don't prop open doors. We know that many doors were propped open during COVID, but it is time to re-secure the entrance/exit points in our buildings.
- With warmer weather on the horizon, we will need to look at using fans to improve airflow vs. propping open doors.
- Make sure you are familiar with GM's Cybersecurity policies – it is amazing what hackers can do to disrupt our business. Follow our policies to keep our technology secure. This list will help us make immediate improvements to our plant security efforts. In addition to these items, I am asking the plant leadership team to focus on what additional steps we can take to secure our workplace. If you have ideas, please share them with your Group Leader. Thanks for making plant security a team effort – it benefits us all.

**Phil Kienle**  
 Vice President GMNA Manufacturing & Labor Relations

### KEEPING OUR FACILITIES SECURE AND SAFE

**It's on ME, YOU, & EVERYONE Working at this Facility**

- If you see something that looks out of place and/or suspicious, alert your supervisor, security or HR/LR.
- Don't prop open doors and let anyone outside of our work environment to get in and disrupt our workplace.
- Don't give hackers any chance, Get familiar with GM's Cybersecurity policies

If you see something, say something, **SPEAK UP!**
